From Monday October 29. to Thursday November 1. 1677.

Tangier, Septemb. 22.

WE learn from a good hand, that in the Turks Man of War that was engaged lately with the *Saphire* Frigat, not only the Captain, but above sixty Men were killed, besides wounded. Three days since Sir *John Narborough* gave Chace off of *Tarifa* to five Turks Men of War, but being very clean (not having been at Sea above five or six days) they all escaped. The Work of the Mole here is carried on with great success.

Madrid, Octob. 21. On the last of *September* the King went to the *Escurial*, and will continue there till *All Souls* day, his Majesty entertaining himself chiefly in hunting. The Marquis *de Montealegre* since his being removed from the Presidentship of the Council of State, has notwithstanding frequently appeared in the said Council. The Constable of *Colonna* Duke of *Tallacozo* (a *Roman*, but by his Estate in *Naples* Subject to this Crown, and a Grandee) is made Vice-roy of *Arragon*. The Conde *de Monterey* is recalled from *Catalonia*, and is made President of the Council of *Flanders* in the room of the Prince of *Stigliano*, who is in disfavor at Court. The Conde *d'Ernanuez* General of the Artillery in *Sicily*, is lately arrived here from thence, and hath given an account of the ill posture the affairs of that Kingdom are in. The Conde *de Banos*, one of the first Nobility in this Kingdom, aged about 75 years, sometime Viceroy of *New Spain*, having about a year ago put himself into the Order of the Barefooted *Carmelite* Friers, and having passed his Noviceship, he Celebrated High Mass in the presence of all the Nobility and Persons of Quality of this Court, who had been invited to assist at the Solemnity. We have advice from *Tangier*, that on the 8th instant some of the English Frigats gave Chace to an Algierine Man of War called the *Golden Horse*, of 36 Guns, and 265 Men, commanded by *Hans Raiz* a Dutch Renegade off of *Gibraltar*, and came up with him; the Turk defended himself pretty well, but having received several broad sides, was taken by one of the said Frigats; The Turkish Captain was found slain with about 100 men (many of which were killed by the Captains own hand for offering to yield.) In this action Captain *Canning* Commander of the *James* Frigat, was unhappily killed by a Musket bullet.

Dantzicke, Octob. 16. The King of *Poland* has made the Bishop of *Warmia*, Vicechancellor of the Crown, Archbishop of *Gnesna*; and at the same time the Charge of Vicechancellor his Majesty disposed of to the Bishop of *Sufeori*. We do not as yet hear any thing of the march of the Suedes Army in *Livonia*, so that the Besieged in *Stetin* must not expect any Relief from thence. The Letters we receive from *Leopol* dated the first instant, do not only confirm the news we had of a Victory obtained by the Moscovites over the Turks, but add, that the latter had been forced to raise the Siege of *Czechrim*, and had repassed the *Niester*; their General *Zeitan* Bassa having sent to *Sierko* General of the Cossacks, to press him to join with the Forces of the Grand Signior.

Vienna, Octob. 17. *Don Bernardo de Salinas* is arrived here in quality of Envoy Extraordinary from the Governor of the Spanish Netherlands. On Monday last his Imperial Majesty went to *Neustadt*, to give a Visit to his Sister the Queen-Dowager of *Poland*, whose marriage with the Duke of *Lorrain* will be consummated so soon as his Highness returns from the Army. Here are arrived Deputies from the Magistrates of *Strasbourg*, to sollicite a moderation of the Sum imposed upon them for Winter-quarters. The Marquis *de Grana* has received from *Spain* the Order of the Golden Fleece, and in a day or two will be performed the Ceremony of Investing him with it. From *Hungary* they write as if some thousand Poles were on their march to join with the Malecontents.

Hamburg, Octob. 20. They write from the Camp before *Stetin*, that on Friday night last the Lunenburgs took a Ravelin without the loss of one Man, (the Suedes having it seems abandoned it) and that they are advanced with their Approaches to the Walls and Palisadoes of the Town; that some Deserters had assured his Electoral Highness, that the Besieged were resolved to surrender the Town, so soon as they should have certain advice that the Isle of *Rugen* should be lost, which as yet they would not believe, but did flatter themselves that the Danes were beaten off again, and that the Lunenburgs were going to leave the Siege. Others write from thence, that the Siege goes on very slowly, chiefly occasioned by the ill weather they have had of late; that the Sickness in the Camp encreases daily more and more, and that the Soldiers are put to hard duty. The Letters we expected this day from *Stralsond* are not yet arrived; but those from *Rostocke* tell us, that Count *Coningsmarke* is posted with his Cavalry between *Barth* and *Stralsond*.

Strasbourg, Octob. 28. The Duke of *Lorrain*, after having sent a detachement under the command of Major General *Rabata* to cover the Posts which the Imperialists are possessed of on the *Saar*, decamped from *Mittelhausen*, through want of Forage, and went and encamped at *Phaffenhoven*, nine Leagues from this City. His Highness has received from *Vienna* the Emperors final Orders concerning the distribution of the Winter-quarters.

Cologne, Octob. 29. Our Advices from above tell us, that the Duke of *Lorrain* had sent the Troops of the Circles under the command of the Count *de Rabata* to attack *la Petite Pierre*, and that Colonel *de la Chausse* was likewise marched that way with a detachement of Imperial Troops. By Passengers come hither from *Bonne* we are told, that several Officers of the Marquis *de Grana*'s Regiment, were arrived there, and that that Regiment was expected there very suddenly. We are told that 3000 Imperialists are appointed to winter in this Diocess, on pretence to secure it against the incursions of the Garison of *Maestricht*,
